Japanese War Crimes and Related Topics: A Guide to Records at the National Archives United States. National Archives and Records Administration,200? This finding aid will help researchers interested in Japanese war crimes war criminals and war crimes trials to navigate the vast holdings of the U S National Archives and Records Administration at College Park NARA It will also be useful to anyone interested in military intelligence political diplomatic economic financial social and cultural activities in the Far East during 1931 1951 as well as to those searching for information regarding Allied prisoners of war the organization functions and activities of American and Allied agencies and the Japanese occupation of countries and the American occupation of Japan While not aimed at researchers interested in the strategic and tactical military and naval history of the war in the Far East this finding aid may nevertheless be useful to those with such interests if only to identify record groups and series of records that may bear on those topics This finding aid covers records from over twenty record groups and includes materials declassified under the Japanese Imperial Government Disclosure Act of 2000 P L 106 567 as well as records that were never classified and those declassified before the passage of the Disclosure Act Because the process of identifying declassifying accessioning and processing of records under the Act is taking place as this finding is being compiled late arriving records may not be identified in this finding aid Researchers should consult the IWG Web site <http://www.archives.gov/iwg> for a complete and up to date list of records declassified under the Japanese Imperial Government Disclosure Act Federal agencies involved in the identification and declassification of relevant classified records ascertained that there were relatively few pertinent records that were still classified Most relevant

records were either never classified or were declassified decades before the Act and were already in NARA's custody. While this finding aid's coverage is broad, it is not comprehensive. Researchers may find other relevant series of records within the record groups mentioned or not mentioned. Researchers are encouraged to use other finding aids and consult with NARA staff to locate records of interest. In addition, the National Archives at College Park holds nontextual records such as still photographs and motion pictures that researchers may want to examine. Other NARA facilities hold many records and donated material related to World War II, including records related to the subjects covered in this finding aid. This is particularly true of the Franklin D. Roosevelt, the Harry S. Truman, and the Dwight D. Eisenhower Archives. Think of archives as vast mountain ranges of records with the archivists guiding the expeditions. Explorations on familiar, well-trodden paths produce new perspectives when examined with fresh eyes and imagination.

Fundamentals of Exploratory Analysis of Variance David C. Hoaglin, Frederick Mosteller, John W. Tukey, 2009-09-25. The analysis of variance is presented as an exploratory component of data analysis while retaining the customary least squares fitting methods. Balanced data layouts are used to reveal key ideas and techniques for exploration. The approach emphasizes both the individual observations and the separate parts that the analysis produces. Most chapters include exercises and the appendices give selected percentage points of the Gaussian, t , F , χ^2 , and studentized range distributions.

Introduction to Probability with Texas Hold 'em Examples Frederic Paik Schoenberg, 2016-12-19. Introduction to Probability with Texas Hold 'em Examples illustrates both standard and advanced probability topics using the popular poker game of Texas Hold 'em rather than the typical balls in urns. The author uses students' natural interest in poker to teach important concepts in probability.

No Limit Hold 'em David Sklansky, Ed Miller, 2006. No limit hold 'em is exploding in popularity. Before 2000 it could be difficult to find a game. In 2006 it is played everywhere in casino cardrooms, in backrooms and homes, and on the Internet. Now anyone can find a game, but few know how to play well. Most players learn by watching television or by listening to dubious advice from their friends. While they may have picked up a valuable tidbit here or there, most players have two options: wise up or go broke. The world's foremost poker theorist, David Sklansky, and noted poker authority Ed Miller will wise you up quickly. **No Limit Hold 'em Theory and Practice** is the definitive work on this complex game. It provides you a window into the heads of experts teaching you in straightforward and enjoyable terms the how's and why's of winning play. Book jacket.
