Statman,2023-04-26 A Global Enlightenment is a book about the idea of Western progress told through a series of conversations about Chinese science Its protagonists an ex Jesuit missionary a French statesman a Manchu prince Chinese literati European savants and other figures of the late Enlightenment world exchanged ideas across cultures In telling their stories here Alexander Statman shows how Chinese science shaped a signature legacy of the European Enlightenment the idea of Western progress By focusing on the orphans of the Enlightenment those who sought to vindicate ancient wisdom as others left it behind Statman reveals that ideas about the uniqueness of the West and the mystery inscrutability or otherness of the East did not follow from the Enlightenment idea of progress but had to be invented The orphans of the Enlightenment believed that the knowledge of the past and the East still had value for modern Europe and their efforts to recover and explain it in turn uncover an unknown story of European engagement with Chinese science In contrast to the common view that over the course of the Enlightenment non Western ideas were banished from European thought Statman found that the opposite is true Toward the end of the Enlightenment Europeans only grew more interested in Chinese science and this has had lasting effects from the eighteenth century to today
