## 429:

Ford 429/460 Engines Charles Morris, 2019-03-21 Ford was unique in that it had two very different big block engine designs during the height of the muscle car era. The original FE engine design was pioneered in the late 1950s primarily as a more powerful replacement for the dated Y block design. What began as torquey engines meant to move heavyweight sedans morphed into screaming high performance mills that won Le Mans and drag racing championships throughout the 1960s. By the late 1960s the FE design was dated so Ford replaced it with the 385 series also known as the Lima design in displacements of 429 and 460 ci which was similar to the canted valve Cleveland design being pioneered at the same time. It didn't share the FE pedigree of racing success mostly due to timing but the new design was better in almost every way it exists via Ford Motorsports offerings to this day. Beginning in 1971 the 429 found its way between the fenders of Mustangs and Torinos in high compression 4 barrel versions called the Cobra Jet and Super Cobra Jet and they were some of the most powerful passenger car engines Ford had ever built. If the muscle car era had not died out shortly after the release of these powerful engines without a doubt the 429 performance variants would be ranked with the legendary big blocks of all time. In this revised edition of *How to Rebuild Big Block Ford Engines* now titled *Ford 429 460 Engines How to Rebuild* Ford expert Charles Morris covers all the procedures, processes and techniques for rebuilding your 385 Series big block. Step by step text provides details for determining whether your engine actually needs a rebuild, preparation and removal, disassembly, inspection, cleaning, machining and parts selection, reassembly, start up and tuning. Also included is a chapter on building the special Boss 429 engines as well as a bonus chapter on the Ford 351 Cleveland, Ford's little brother to the big block.

*1969-1970 Ford Mustang Boss 429* Daniel Burrill, 2017-07-17 Not to be outdone by Chrysler, Ford had to build and field its own race duty big block to compete with the 426 Hemi in drag and stock car racing. In competition trim the Boss 429 powered Ford and Mercury stock cars to victory in NASCAR and the Mustang to many wins in drag racing. With this exclusive racing pedigree the Boss 429 is among the most valuable and rare Mustangs ever built. The project was the brainchild of Bunkie Knudsen, noted stylist Larry Shinoda and other talented Ford personnel. The semi-hemi Boss 429 was so large it couldn't fit in the small Mustang so Kar Kraft, a specialty car builder, had to shoehorn the engine into the compact Mustang fastback. Author Dan Burrill gives you the straight story on the Boss 429, its special equipment, 429 engine, 4 speed Toploader transmission, interior appointments, paint codes and options. Also featured is the exciting story of developing this monumental engine, engineering the components and parts to fit the engine and chassis and assembling the cars. Each volume in the *In Detail Series* provides an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, an in depth study of all hardware and available options and an examination of where the car is on the market today. Also included are paint and option codes, VIN and build tag decoders as well as production numbers.
