**Experiment with Parliamentary Governance** Mangol Bayat,2020-08-17 For the past several decades scholars have  
studied and written about the Iranian constitutional revolution with the 1979 Islamic Revolution as a subtext obscuring the  
secularist trend that characterized its very nature Constitutionalist leaders represented a diverse composite of beliefs yet  
they all shared a similar vision of a new Iran one that included far reaching modernizing reforms and concepts rooted in the  
European Enlightenment The second national assembly majles during its brief two year term aspired to legislate these  
reforms in one of the most important experiments in parliamentary governance Mangol Bayat provides a much needed  
detailed analysis of this historic episode examining the national and international actors and the political climate that  
engendered one crisis after another ultimately leading to its fateful end Bayat highlights the radical transformation of old  
institutions and the innovation of new ones and most importantly shows how this term provided a reasonably successful  
model of parliament imposing its will on the executive power that was primarily composed of old guard elite leaders At the  
same time Bayat challenges the traditional perception among scholars that reform attempts failed due to sectarian politics  
and ideological differences      Official Gazette of the United States Patent Office United States. Patent Office,1920

**Orsanmichele** Marie D'Aguanno Ito,2023-10-09 This work provides a new narrative for Orsanmichele in the era before  
the Renaissance It examines Orsanmichele from the mid thirteenth century as the piazza transformed into the city s grain  
market It considers the market s tandem confraternity with its stunning Madonnas over three successive loggias It examines  
the grain market and confraternity from a social economic political and artistic perspective It provides extensive data on the  
Florentine grain trade sales at the market and the nexus between traders political leaders and the confraternity The work  
suggests that developments at Orsanmichele during the medieval period formed the basis for the Renaissance structure

**Actinobacteria in Special and Extreme Habitats: Diversity, Function Roles and Environmental Adaptations**

Sheng Qin,Wen-Jun Li,Syed G. Dastager,Wael N. Hozzein,2016-11-09 Actinobacteria are highly diverse prokaryotes that are  
ubiquitous in soil freshwater and marine ecosystems Although various studies have focused on the ecology of this phylum  
data are still scant on the diversity abundance and ecology of actinobacteria endemic to special and extreme environments

such as gut plant alkaline saline soil deep sea sediments hot springs and other habitats Actinobacteria are well known producers of a vast array of secondary metabolites many of which have useful applications in medicine and agriculture Furthermore actinobacteria also have diverse functions in different environments apart from antibiotic production For example actinobacteria are reported to contribute to the break down and recycling of organic compounds They play a significant role in fixation of nitrogen improvement plant growth biodegradation bioremediation and environmental protection Therefore understanding the actinobacterial diversity and distribution in such special environments is important in deciphering the ecological roles of these microorganisms and for biotechnological bioprospecting Recent advances in cultivation DNA sequencing technologies and omics metagenomics metaproteomics etc methods have greatly contributed to the rapid advancement of our understanding of microbial diversity function and they interactions with environment Furthermore comparative genomic studies can provide overall information about actinobacterial speciation evolution metabolism and environment adaptation mechanisms This research topic comprising reviews and original articles highlights the recent advances regarding the unexpectedly diverse rare group of actinobacteria with special selective isolation methods or culture independent methods as well as their biological activities ecophysiological function and mechanisms from diverse special and extreme environments
