Past a Sharp Leading Edge** Howard A. Stine,Cleo B. Wagoner,Alvin L. Lugn,1960 An experimental and theoretical study
has been made of the two dimensional transonic flow past a 12 wedge airfoil with lower surface inclined 13 to the air stream
The experimental portion of the study consists of surveys of the flow field about the leading edge in a closed throat tunnel
near choking Mach number by means of an X ray densitometer From these surveys various features have been determined
namely the location of the stagnation point the location of the sonic line the size of the separation bubble on the upper
surface and the value of the Mach number at the bubble edge These features were relatively insensitive to changes in
Reynolds number in the range from 1×10^6 to 3×10^6 based on chord The theoretical portion of the study consists of the
calculation by relaxation methods of an unbounded inviscid two dimensional flow about a portion of the same body at a free
stream Mach number of exactly unity The calculations yield a separation bubble on the upper surface which has a shape
shown to be compatible with known theoretical conditions for viscous attachment to the upper surface of the body
Agreement between theoretically calculated and the experimentally determined features of the flow was good in regions
where the local Mach number was 2 or less In regions of higher local Mach number the agreement was fair The theoretically
determined Mach number on the bubble edge was 2.80 whereas the experimentally determined value was 2.30 The
theoretically determined length of the separation bubble was 1.54 percent chord whereas the experimentally determined
length was about 5 percent chord The theoretically determined location of the stagnation point was 0.16 percent chord from
the leading edge whereas the experimentally determined location was at 0.56 percent chord The experience gained in
studying the flow suggests the possibility that the solution obtained is not unique and that another solution in better
agreement with experiment might exist *Statutes of California and Digests of Measures* California,1997 **The West
