Systems H. Broer,F. Takens,B. Hasselblatt,2010-11-10 In this volume the authors present a collection of surveys on various aspects of the theory of bifurcations of differentiable dynamical systems and related topics By selecting these subjects they focus on those developments from which research will be active in the coming years The surveys are intended to educate the reader on the recent literature on the following subjects transversality and generic properties like the various forms of the so called Kupka Smale theorem the Closing Lemma and generic local bifurcations of functions so called catastrophe theory and generic local bifurcations in 1 parameter families of dynamical systems and notions of structural stability and moduli Covers recent literature on various topics related to the theory of bifurcations of differentiable dynamical systems Highlights developments that are the foundation for future research in this field Provides material in the form of surveys which are important tools for introducing the bifurcations of differentiable dynamical systems Reproduction and Social Organization in Sub-Saharan Africa Ron J. Lesthaeghe,2023-11-15 Unlike most Asian and Latin American countries sub Saharan Africa has seen both an increase in population growth rates and a weakening of traditional patterns of child spacing since the 1960s It is tempting to conclude that sub Saharan countries have simply not reached adequate levels of income education and urbanization for a fertility decline to occur This book argues however that such a socioeconomic threshold hypothesis will not provide an adequate basis for comparison These authors take the view that any reproductive regime is also anchored to a broader pattern of social organization including the prevailing modes of production rules of exchange patterns of religious systems kinship structure division of labor and gender roles They link the characteristic features of the African reproductive regime with regard to nuptiality polygyny breastfeeding postpartum abstinence sterility and child fostering to other specifically African characteristics of social organization and culture Substantial attention is paid to the heterogeneity that prevails among sub Saharan societies and considerable use is made therefore of interethnic comparisons As a result the book goes considerably beyond mere demographic description and builds bridges between demography and anthropology or sociology This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a

backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989 *Medical Device Regulation* Elijah Wreh,2023-02-22 *Medical Device Regulation* provides the current FDA CDRH thinking on the regulation of medical devices This book offers information on how devices meet criteria for being a medical device which agencies regulate medical devices how policies regarding regulation affect the market rules regarding marketing and laws and standards that govern testing This practical well structured reference tool helps medical device manufacturers both in and out of the United States with premarket application and meeting complex FDA regulatory requirements The book delivers a comprehensive overview of the field from an author with expertise in regulatory affairs and commercialization of medical devices Offers a unique focus on the regulatory affairs industry specifically targeted at regulatory affairs professionals and those seeking certification Puts regulations in the context of contemporary design Includes case studies and applications of regulations Linguistic Semantics William Frawley,2013-11-05 This volume is a comprehensive up to date and readable introduction to linguistic meaning While partial to conceptual and typological approaches the book also presents results from formal approaches Throughout the focus is on grammatical meaning the way languages delineate universal semantic space and encode it in grammatical form Subjects covered by the author include the domain of linguistic semantics and the basic tools assumptions and issues of semantic analysis semantic properties of entities events and thematic roles language and space tense aspect and the internal structure and temporal ordering of events modality negation and the epistemology of the speaker and modification and attribution In contrast to most current treatments of semantics this book is accessible to the beginning student of semantics and linguistics and also useful to the advanced practitioner A textbook and reference work in a single volume it can be used in a number of disciplines psychology computer science and anthropology as well as linguistics
