1015:

, Reactions of Hydroxyl Radicals with Oxygenated Hydrocarbons in the Gas Phase: A Laser Photolysis/Laser-Induced Fluorescence Study Cornelia Bänsch, 2017 Hydroxyl radicals OH play a key role in ignition processes and in the atmosphere. Thus the detailed knowledge of the kinetics of OH reactions is crucial in combustion and atmospheric research. In this work an experimental approach for time resolved studies of OH radical reactions at high pressures with pulsed laser photolysis laser induced fluorescence was revised and the reactions of dimethyl ether diethyl ether and dimethoxymethane with OH radicals were investigated in detail. The results reveal a deeper insight into the reaction processes of ether compounds with OH in general contributing to a better understanding of the combustion of different biofuels and fuel additives.

Engineering Materials List, **Hydrometeorological Report**, 1954 **Meteorology of Hydrologically Critical Storms in California** Robert L. Weaver, 1962 *Geochemistry of Sedimentary Carbonates* J.W. Morse, F.T. Mackenzie, 1990-08-27 This book covers the more basic aspects of carbonate minerals and their interaction with aqueous solutions, modern marine carbonate formation and sediments, carbonate diagenesis, early marine meteoric and burial, the global cycle of carbon and human intervention and the role of sedimentary carbonates as indicators of stability and changes in the Earth's surface environment. The selected subjects are presented with sufficient background information to enable the non-specialist to understand the basic chemistry involved. Tested on classes taught by the authors and approved by the students, this comprehensive volume will prove itself to be a valuable reference source to students, researchers and professionals in the fields of oceanography, geochemistry, petrology, environmental science and petroleum geology.
